

---

Please allow a small quiet area for any important content from the very top of the artwork (see guide). This means the top metal rail won't interfere with your design.

Please make full use of the bleed area and include this along with crop marks when exporting your print-ready PDF(s).

Please allow a small quiet area for any important content away from the bottom section (see guide). This is to safely ensure your design has some breathing space.

---

Please leave the bottom 30mm area (150mm at full size) blank or only use it for background colours/images. This section will be hidden and rolled into the unit mechanism.
